PROFESSIONAL SUMMARY

MSc Computer Science graduate (May 2026) specialising in AI, Machine Learning, and Full-Stack Web Development. Completed a hands-on internship building a full-stack Bus Ticket Booking web application using ReactJS, Spring Boot, and PostgreSQL. Engineered 4 end-to-end projects — including a real-time facial-recognition attendance system and a cross-platform mobile app — automating processes and cutting manual effort by 80%. Ranked #1 in class with 6 subject topper distinctions across AI, ML, Data Science, Cryptography, and Theory of Computation.

EDUCATION

MSc Computer Science — Nazareth College of Arts and Science, Chennai | *May 2026 (Awaiting Results)*
Class Topper · Ranked #1 in class

BCA — Vel Tech Ranga Sanku Arts College, University of Madras | *2024*

TECHNICAL SKILLS

Languages: Python, SQL, Dart, JavaScript, PHP

Frameworks & Libraries: ReactJS, Flutter, OpenCV, DeepFace,

Databases: MySQL, PostgreSQL, Firebase

Tools & Platforms: Git, GitHub, Postman, IntelliJ IDEA, VS Code

AI / ML: Machine Learning, Computer Vision, Facial Recognition

Web Development: Full-Stack Development, HTML, CSS, Responsive Design

Soft Skills: Problem Solving · Team Collaboration · Communication · Leadership · Analytical Thinking

WORK EXPERIENCE

Web Development Intern | [Scale Up Institute, Avadi](#) | *June 2025 – July 2025*

Tech Stack: ReactJS, Spring Boot, PostgreSQL, Firebase Auth, Postman, GitHub, Docker

- Developed EliteBus, a full-stack Bus Ticket Booking web application covering end-to-end user flows including sign-up, seat selection, drop-point management, and booking confirmation.
- Designed and implemented RESTful APIs using Spring Boot (IntelliJ IDEA) and connected them to a PostgreSQL database (pgAdmin), applying schema normalisation and foreign-key relationships to ensure data integrity.
- Built an interactive ReactJS frontend with component-based UI, client-side routing, and responsive layouts, reducing page load complexity by structuring reusable widgets.
- Integrated Firebase Authentication for secure user login, resolving async token-handling issues using async/await patterns and backend token validation.

PROJECT EXPERIENCE

Full-Stack AI Developer — AI Smart Attendance System | [Academic Project](#) | *2025 – 2026*

Tech Stack: Python, OpenCV, DeepFace

- Architected and implemented a real-time facial-recognition attendance system using DeepFace, achieving ~95% identification accuracy across 50+ registered users.
- Gained hands-on experience integrating an OpenCV live video stream pipeline, processing 20+ frames per second for instant face verification and automated attendance logging.
- Automated end-to-end attendance recording, eliminating 100% of manual roll-call effort and reducing the process time by 80% — validated through classroom deployment trials.
-  [Live Demo: ai-attendance-system-e254.onrender.com](#)

Full-Stack Web Developer — E-Waste Management System | Academic Project | 2025

Tech Stack: PHP, Firebase, HTML, CSS

- Built a multi-role full-stack web platform (admin, collector, user) for managing e-waste collection requests, tracking, and disposal workflows from scratch.
- Gained hands-on experience with Firebase Realtime Database integration, enabling instant status updates and achieving near-zero data sync latency across all user roles.
- Implemented secure login with role-based access control (RBAC) and real-time tracking dashboards, applying security best practices learned through practical development.
-  [Live: ewaste-bafdd.web.app](https://ewaste-bafdd.web.app)

Mobile App Developer — AI Resume Builder | Academic Project | 2026

Tech Stack: Flutter, Dart

- Developed a cross-platform Flutter application with AI-assisted content suggestions, reducing resume creation time from ~60 minutes to under 10 minutes through guided input flows.
- Applied hands-on experience with Flutter widget trees and dynamic PDF export, delivering 5+ customisable resume templates with a clean, production-ready UI.

Frontend Developer — Portfolio Website | Personal Project | 2026

Tech Stack: ReactJS, HTML, CSS

- Designed and deployed a responsive personal portfolio achieving a 95+ Lighthouse performance score, applying mobile-first design principles and smooth CSS animations.
- Showcased 4 projects with optimised asset loading and SEO-friendly structure, increasing recruiter engagement through clear project narratives and live demo links.
-  [Live: perumalgullu.github.io/portfolio-2](https://perumalgullu.github.io/portfolio-2)

CERTIFICATIONS

- Responsive Web Design Developer Certification — freeCodeCamp | Jan 2026 · HTML5, CSS3, Responsive Design, Accessibility
- JavaScript Developer Certification — freeCodeCamp | Jun 2026 · JavaScript, ES6+, DOM Manipulation, Algorithms, Data Structures (~300 hrs)
- ReactJS Foundations Course — ScholarHat | Jun 2026 · ReactJS, JSX, Components, Props, State Management, Hooks

ACHIEVEMENTS & AWARDS

- Class Topper — MSc Computer Science — Ranked #1 in class
- Subject Topper — Artificial Intelligence
- Subject Topper — Machine Learning
- Subject Topper — Data Science & Analytics
- Subject Topper — Cryptography
- Subject Topper — Theory of Computation
- Ideathon 2025 — Recognition Award — Selected among top innovators for AI-driven solution
- Class Representative — Elected representative for MSc Computer Science batch; led student-faculty communication
- SDG Quality Analyser — Analysed and evaluated Sustainable Development Goals quality metrics as part of institutional initiative
